Scoring Explanation

A pace score is calculated for every current club member who completes a non-score course. The best 10 pace scores for each club are summed and rounded to obtain that club’s pace score. An individual’s pace score is their race pace in min/km divided by an age factor (see table below) and then converted back to a score out of 10. An age adjusted pace of 5min/km or faster earns 10 points, 10 min/km earns 5 points, 15 min/km earns 3.3 points and 20 min/km earns 2.5 points, etc.

The club turnout score is calculated as the ratio of the number of current club members who entered (online + EOD) divided by the total current club membership from Eventor on the day of the event, expressed as a percentage. Competitors are only counted if they are a current paid up member of a club on the day of the event.

A club’s maximum possible score for an event is 200. This would be achieved if the best ten performances all score 10 (10 × 10 = 100) and every club member enters the event (100%).

Age factors

Age class	10	12	14	16	20	21	35	40	45	50	55	60	65	70	75	80	85	90
M	1.22	1.20	1.18	1.16	1.09	1.00	1.10	1.20	1.26	1.33	1.40	1.49	1.64	1.90	2.40	3.60	5.13	6.66
W	1.50	1.49	1.48	1.38	1.28	1.21	1.41	1.61	1.66	1.72	1.84	1.96	2.30	2.85	3.74	4.80	6.00	7.50

Age factors are derived from an average of the min/km rates of the first two place getters in each class at the Australian Long-Distance Champs for the five years 2014-18. The age factor for each age class is its average min/km rate divided by the M21 average min/km rate, subject to some smoothing of outliers.
