

BOSS 3 GLENROCK ADDITIONAL INSTRUCTIONS

Due to the on going Covid situation and the layout of Glenrock and limited access, there will be a few minor changes to the registration and start procedure. In addition this event will use MapRun6.

REGISTRATION

All riders are asked to attend registration to have their name marked off or to pick up hire gear.

Pick up your map for both the Line Score and All Score category at registration.

Seperate instructions are provided on Eventor to set up MapRun 6 on your phone and watch.

START/FINISH

The start and finish flags are together and located on the side of Gun Club road.

When you are ready to start and your phone/watch is set up go to the flags and your phone or watch will start.

When you have finished please return to the registration area and have your name ticked off as finished.

Please practice social distancing at the registration area, start/finish and parking area.

ON THE COURSE

There will be a flag only at the control location.

The control is set to register at around 15m from the control.

If your phone or watch does not register make sure you ride to the flag then move off.

You can return to registration where your course on MapRun can be checked to see if you visited the control.

All Line Score competitors must attend registration on completion as the Line section of the course has to be checked manually as MapRun does not allow for a Line Course.

Do not ride near the finish flag if you are still on the course as your phone may register that you have completed the course.

You must obey track direction markers on the ground. They are also shown on the map with red arrows. There will be other riders on the course riding in the direction of the markers around Glenrock.

The registration of controls may vary depending on overhead cover and your phone settings/gps receiver. If you go to the flag we can record manually that you have visited the control. Avoid riding around or spending time waiting for a signal if you are at the flag.
