

Luck Controls

Tonight's course is a special celebrating last week's St Patrick's Day. It has 20 luck controls in addition to normal controls. Luck controls are controls that exist but are not shown on the map and that require pure luck to find. May the "luck of the Irish" be with you!

How it works:

- Each luck control out on the course is marked with a traditional orange and white orienteering flag.
- The MapRun app on your phone will punch the control if you approach the flag.
- Each luck control will be either 30, 50, 70 or 90 points. While each normal control will be either 20, 40, 60, 80 or 100 points. Note that this means that, if you're interested, after finishing you can easily determine the total of an entrant's score that was due to luck.

ADDITIONAL NOTE: A hint to find the 70 point controls - look ahead past standard controls and look up and down intersecting roads/paths on the way to standard controls.
