

**OY 8 Goolman 16<sup>th</sup> July 2023** SI Air event, mainly spur gully but with point features.

**Setter:** Lachlan Howard

**Controller:** David Firman

**PC:** Tony Bryant

**Date:** Sunday July 16; starts 9:00am to 10:00am. Course Close **STRICTLY MIDDAY**.

**Map notes:**

Please note the map is **six years old**, in places water courses are more defined than mapped. Additionally, the termites have been very busy on this map, there are many **new termite mounds** and some are **missing**. **Please do not use termite mounds for navigating use the shape of the land.**

**Course notes:**

Get excited, although this map is steep in places, it is **FAST**. There is very limited undergrowth or lantana, there has been back burning in some areas and other areas are just plain nice and open. Courses have been set to use the best parts of the map (hence the annoying *walk* to the start....). Get your route choice hats on, the legs are **long with lots choices**, do you contour or do you climb up and over, we'll let you decide.

Get keen and good luck.

There are **two** different starts: H1, H2, Easy and Very Easy will start 30m SW of the assembly area at S1.

All other courses have a 800m (40m climb) walk on the track that heads east of the assembly area at S2.

	Course Distance	Controls
H1	7.0	11
H2	5.2	10
H3	4.1	9
H4	2.6	6
H5	2.0	6
M1	3.0	7
M2	2.2	7
E	2.5	9
VE	2.3	8

#### Distances and courses:

Course distances have been reduced due to the high climb percent, take this into consideration when choosing your course. H1 and H2 take on the full tour of the map and H5 has been set to visit the more undulating areas of the map.

There is also a 60 minute score event, it will start from S1 start located SW of the assembly.

**Entries Close strictly 11:59pm on the Thursday prior to the event. Enter here:**

<https://eventor.orienteering.asn.au/Events/Show/18021>

**Parking** on the sides of Spowers Rd, please leave some space at the end of the cul-de-sac for the general public.

**Animals** including dogs are not permitted on site.
