

Bendigo Bush 8 – Event information

Terrain- The terrain is gently undulating with fast running for those of that persuasion, or pleasant walking for the rest.

Map- The area was remapped over the past three weeks. The original map was 15 years old. Many new tracks had appeared and a few had disappeared. The vegetation had changed due to drought and burning. The new map is a full remap using a lidar base and 2.5 metre contours. Part of the map is shown below.

Courses- Due to the at times dense track network, the hard courses resemble a middle format rather than the long format. This minimizes the track running options.

Course	Distance	Climb	Navigation	Scale
1	7.0	80m	Hard	15000
2	5.4	65m	Hard	10000
3	3.6	35m	Hard	10000
4	3.7	30m	Moderate	10000
5	2.1	20m	Easy	10000
