- Full body cover and O shoes are recommended
- Some areas of forest have developed undergrowth since the map was finished last year
- While much of the rock has been mapped, there is still a little unmapped rock around
- There are several uncrossable cliffs which definitely should NOT be crossed
- There are some “detail not mapped” sections on the edges of the map
- Due to the small area, there will be a map change on all 5 ML courses
- There will be an Easy course but no Very Easy course
