

The two levels create tunnels and these are shown with the tunnel symbol. Figure 1 shows an example of mapping a tunnel.

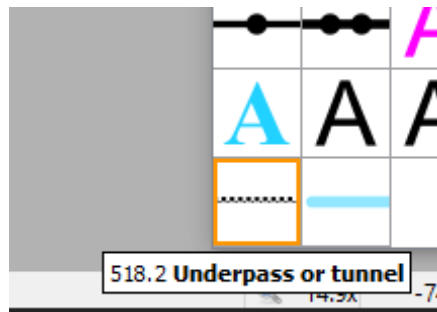

Figure 1, in this example, the thicket is at ground level and grows through the first level. Competitors entering the tunnel from the west or northwest can visit control 2 at ground level and exit via a tunnel in the east.

Figure 3 Thicket east end

## Out of Bounds

Out of bounds areas are shown with red lines and mostly indicate a building site. The out of bounds symbol has been used in one area to preserve newly laid grass. Please respect the exclusion tapes.

## Arena Passage

All courses include a mandatory arena passage. Competitors should follow the taped route.

## Controls

Some courses will include loops with a pivot control that is visited more than once. Competitors should check the control number carefully, there are lots of controls.

Important Give way to competitors.

There is a large gateway through which competitors and spectators will enter the arena, competitors will exit the arena passage and competitors will finish their course. It will be a busy place.

Competitors should gain right of way but be careful not to collide with each other. Marshalls will be on hand to help guide the process.

## Other users

A language school is using classrooms around the school for their lessons during competition times. They are aware of us and should not touch controls but competitors may have some spectators as they visit controls.
