#### Scoring Explanation

A pace score is calculated for every current club member who completes a course. The best 10 pace scores for each club are summed to obtain that club's Pace score. An individual's pace score is their race pace in min/km divided by an age factor (see previous events for table) and then converted back to a score out of 10. An age adjusted pace of 5min/km or faster earns 10 points, 10 min/km earns 5 points, 15 min/km earns 3.3 points and 20 min/km earns 2.5 points, etc.

The club turnout score is calculated as the ratio of the number of current club members who entered (online + EOD) divided by the total current club membership from Eventor on the evening of the event, expressed as a percentage. Competitors are only counted if they are a current paid up member of a club on the day of the event.

A club's maximum possible score for an event is 200 – This would be achieved if the best ten performances all score 10 (10 x 10 = 100) and every club member enters the event (100%).

The Vic Club Relays scores are the raw scores gained by club teams using the previous Vic Club Relays scoring rules. The Weighted Relays scores are the raw scores x 6 in order to give the Vic Club Relays results a similar weighting to the overall Vic Autumn Series results in the overall Rockhopper Trophy score.
