

Direction to Awoonga.

Proceed on the Federal Highway from Canberra towards Lake George and immediately before the escarpment (at the Weereewa lookout) turn left into Hadlow Drive (the old highway) then after about 200m turn right into Ridge Road which is a somewhat eroded dirt road. After 550m turn left immediately after the cattle grid into Nerrin Lane and follow it for 2.1 km. Nerrin Lane is a private road leading the private property where the assembly is located. While this is 2 WD negotiable please drive slowly and take care as it is a gravel road with some steep sections and sharp turns, and in one downhill part has loose stones which can be slippery. A gold coin donation will be sought on arrival at the assembly.

Setter's Notes:

There are fences that need to be crossed. These are crossable apart from a double stranded fence(s) running east/west across the map. Where this fence is crossable the crossing symbol appears on the map. One crossing is facilitated by the placement of some logs. If these are slippery on the day care should be taken.

Some broken fences are indistinct on the ground. Avoid tripping on wire.

Termite mounds are in active generation and decay. Those within sight of control sites have been corrected. Care should be taken with navigation by termite mounds mid leg.

There are some deep mine shafts in the far south/west of the map. These are clearly mapped and are obvious on the ground but only the longer courses will be near them. Care should be taken when approaching the area.
