

Canning Vale College – NavDash 1

22nd March, 2020

Map Scale – 1:3000 for all courses (plus 1:200 for the maze map on hard courses)

Map – Canning Vale College (2020)

Hard Courses

Both the Long and Short Hard courses will take the following format;

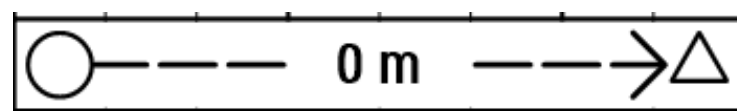

1. The first loop of the course will be printed on the map collected at the start.
2. The first loop through the school will finish at a control near a section of the map marked with an uncrossable fence symbol (as shown below). At this point there will be a map change.

Competitors will need to place their first map into a box marked “First Loop Maps” and pick up their second map from the appropriately marked box.

On the map this location is marked with a control circle.

The descriptions will indicate the map change as so;

3. The second loop takes place entirely inside the maze. Once you get to the final maze control, flip the map and begin the third loop.

Again, this is the final control marked on the map and shown as above on the descriptions.

4. The third loop takes competitors back into the school and finishes at the finish marked on the map.
5. Descriptions for each section of the course will be printed on the maps.
